April 2015

An article explaining these expenses is [here](#).

Backup	Recommended Program	Cost
- Data backup	Second Copy	\$30
- Imaging	Acronis True Image	\$50
- Off-Site	SpiderOak (30 GB / 1 TB)	\$80 / \$130 (Unlimited computers 1 year)
- Backup Drive	Seagate or WD USB 1 TB	\$60
Anti-Virus	Eset Nod32	\$60 (1 computer 2 years)
Updating	Ninite Updater	\$10 (1 computer 1 year)
New Software	List everything you will need. Office? Accounting? check compatibility with new operating system.	?
Data Transfer	If good backups exist, data transfer is free. Otherwise data recovery is an added expense.	?

Setup & training	- See setup form for what is done.	
- With delivery & onsite training	Within 20-30 minutes of my office	\$250
- Without delivery & training	Pickup at my office. 1/2 hour of training	\$150

Note: Setup prices above are good for my computers and for quality computers bought elsewhere. However, bargain computers which require over 70 Microsoft updates and have crapware that needs to be removed, take a lot more time. A surcharge of \$50 is added.
